

DR. SparkPlay ⚡

Run the centre. Not the photocopier.

The all-in-one platform for Australian early learning centres — front desk to family messages to compliance paperwork — with an AI assistant that does the writing nobody has time for.

Built for the NQF & EYLF

All 9 states & territories

AI where it helps, humans in charge

Yes, the DR. is a doctor joke. It also stands for Daniel Rust, who built it. Both facts hold up under peer review.

THE PROBLEM

Educators are drowning. And not in the water-play trough.

The paperwork avalanche

Observations, incident reports, sleep charts, nappy charts, medication logs, handover books — most of it handwritten, photocopied, and filed in a binder no one can find during an audit.

Compliance anxiety

Ratio rules, mandatory reporting, and regulations differ across every Australian state and territory. Getting it wrong isn't a typo — it's a notice from the regulator.

Communication chaos

Parents find out about the excursion the day after it happened, via a crumpled note excavated from a backpack. In 2026.

The 6pm problem

The children go home at six. The documentation doesn't. Educators finish their admin after close, unpaid, fuelled by cold coffee and dread.

You trained to shape young minds. Somehow you ended up shaping ring binders.

THE SOLUTION

Meet DR. SparkPlay.

DR. SparkPlay is a web platform that runs the entire day of an early learning centre — sign-in, observations, programming, daily forms, compliance, and family communication — in one place, with AI doing the heavy lifting on the writing.

In other words: a very organised assistant director who never calls in sick, has memorised the regulations of every state and territory, and lives in your browser.

Run the day

Kiosk sign-in, roll call, day plans, activities, observations, handover — the daily rhythm of a centre, minus the paper cuts.

Stay compliant

Ratios, medication logs, incident reports, NQS self-assessment, QIP — compliance built into the workflow, not stapled on after.

Keep families close

Daily diaries, messages, community wall, broadcasts in 15 languages, invoices — parents in the loop, not in the dark.

DEMO · HOW IT ACTUALLY WORKS

A day with DR. SparkPlay

- | | |
|----------------|---|
| 7:30am | Families arrive. Kiosk sign-in with a wellbeing check-in — no clipboard, no pen on a string. |
| 9:00am | Roll call. Live ratio check against <i>your</i> state's rules. Allergy and EpiPen badges right on the room board — no memory tests with children's lives. |
| 10:15am | An educator snaps an observation. One save and it's shared with the parent, the child's interests are updated, and a linked activity lands in next week's program. <i>Written once. Typed zero additional times.</i> |
| 12:30pm | Medication given and logged — dose, route, authorisation, witness. Regulation 93 compliant without anyone opening the regulations. |
| 2:00pm | Planning time. The AI drafts an activity from the children's <i>actual current interests</i> , mapped to EYLF outcomes. The educator tweaks and approves. Ten minutes, not ninety. |
| 5:45pm | Shift handover typed and acknowledged by the incoming educator. The sacred paper handover book retires with full honours. |
| 6:01pm | Everyone goes home. On time. <i>Revolutionary, we know.</i> |

FEATURE TOUR

60+ tools. One login. **Zero laminating.***

Front Desk

Kiosk sign in/out · On-site board · Roll call · Casual days · Visitor log

Today

Dashboard · Daily digest · Follow-ups · Day plan · Shift handover

Educator Tools

AI activity generator · Observations · Programming workspace · Milestones · Transition statements · Brain breaks · Auslan dictionary · Poster maker

Enrolments

Children & rooms · Occupancy dashboard · Waiting list from enquiry to enrolled

Daily Forms

Incidents · Medication log · Safety checks · Permission slips · Excursions · Health plans · Sleep, food & nappy charts

Centre Information

Policies · Safe work procedures · QIP & check-ins · NQS self-assessment · Risk assessments · Document import & AI review

Family

Messages · Community wall · Parent diary · Absences · Casual bookings · Notifications

Professional Development

Guided staff reflections · PD hours tracking

Administration

Staff & roster · Compliance tracker · Broadcasts · Invoices · CCS estimator · Service settings

**Some laminating may still occur. We know who you are, and we respect it.*

THE AI ASSISTANT

It does the writing. You do the teaching.

Activity generator

Turns the children's real, current interests into EYLF-mapped activity plans. "Dinosaurs and puddles" in, learning outcomes out.

Document import & review

Upload the policy you wrote in 2019. Get a quality score, the gaps against NQS/EYLF standards, and specific fixes. The file isn't stored — read, reviewed, discarded.

Transition statements

Strengths-based, privacy-safe school transition drafts. The educator edits and finalises — the AI just does the blank-page part.

Broadcasts in 15 languages

Write the newsletter once; every family reads it in their own language. No more "hope Google Translate got that right."

Guided reflections

Generates genuine reflection prompts (Gibbs & Driscoll frameworks) so professional development is actual reflection, not creative box-ticking.

Posters & Auslan

A poster and flier maker with built-in image search, plus an Auslan dictionary linked to real Signbank videos.

Every AI output is a draft. Educators review, edit, and approve — the human stays the author.

COMPLIANCE

Assessor visits: from cold sweat to mild, confident glow.

Compliance in DR. SparkPlay isn't a module you visit. It's baked into the tools educators already use every day.

- ✓ **Jurisdiction-aware ratios** for all 9 Australian states & territories, checked live at roll call
- ✓ **NQS self-assessment** — all 7 quality areas and 15 standards, with ratings and evidence notes
- ✓ **Medication log** built to Regulation 93 — dose, route, authorisation, witness
- ✓ **Staff compliance tracker** — WWCC, First Aid, Anaphylaxis, with expiry alerts before they lapse
- ✓ **Mandatory reporting guidance** — the correct legislation for your state, right on the incident report
- ✓ **QIP with regular check-ins**, so quality improvement is a habit, not a pre-assessment panic
- ✓ **Visitor log** with WWCC and ID checks (NQS Quality Area 2)
- ✓ **Risk assessments & safety checks** — templated, logged, findable in seconds

*"Where's your documentation?" — "One second, I'll search for it." *audible gasp from the assessor**

FOR FAMILIES

Parents: informed, involved, and pleasantly surprised.

The daily diary

Sleep, meals, nappies, and shared observations with photos. "What did you do today?" — "Nothing" — finally has a rebuttal.

Absences & casual days

Report an absence or book an extra day from the couch at 6am. No phone queue, no answering machine.

Notifications that arrive

In-app and email alerts for the things that matter — not a note dissolving at the bottom of a school bag.

Community wall

Two-way posting between the centre and families. A noticeboard people actually read, because it's in their pocket.

Every language, every family

Broadcasts translated into 15 languages so no family is left guessing what "crazy hair day" means.

Money, minus the mystery

Clear invoices with line items, plus a CCS gap-fee estimator so families know the real cost before they commit.

WHY DR. SPARKPLAY WINS

Not another app. The last one you'll need to open.

Write once, propagate everywhere

One observation feeds the parent update, the child's interest profile, and next week's program. Most competitors make you type it three times and call that "integration".

Built for Australia, not translated to it

NQF, EYLF, CCS, WWCC, and state-by-state ratio rules are native concepts — not a US import that asks about your "diaper schedule".

AI-native, not AI-stapled

The AI is woven into the daily workflow — planning, documentation, translation, review — not a chatbot bolted to the side to impress investors.

One platform, one bill

Replaces the sticky-taped stack of a sign-in app, a programming tool, a parent app, a poster site, and four spreadsheets named "FINAL_v7".

Next up: an expanded parent portal, deeper AI document workflows, and a companion experience for families beyond the centre gate.

THE ASK

Let's give educators their **evenings back.**

Every hour DR. SparkPlay saves on paperwork is an hour that goes back into the reason everyone got into this profession: the children.
(And, occasionally, a hot coffee.)
